BEFORE YOU NEED IT

Most families do not lose the house. They lose everything that sits behind a sign-in.

This is a place to write down what you have, where it is kept, who should be told, and what you would prefer. It is one book, filled in over a few evenings, and it answers the question a family asks in the worst week of their lives: where do we start?

- No password, PIN or key is ever written down
- Preference is kept separate from instruction
- Ruled space, not boxes too small to use
- One review a year, with a log of what changed

> **What this book is not.** It is not a will, a power of attorney, a healthcare directive or an estate plan, and filling it in does not create one. It records where those documents are and who prepared them — which is the part families actually struggle with.

WHO IT IS FOR

Anyone who owns a home, a vehicle, an account or a phone — and would rather their family not have to guess. You do not need to be retired, unwell or wealthy to use it, and you do not have to fill it in at one sitting.
